

Compensations of cardiac output and other circulatory functions in areflex dogs with large A-V fistulas. <i>Guyton, A. C. and K. Sagawa</i>	1157	Vasotropic substances in blood in intestinal ischemia shock. <i>Baez, S., S. G. Hershey, and E. A. Rovenstine</i>	1245
Quantitation of cerebral ischemic pressor response in dogs. <i>Sagawa, K., J. M. Ross, and A. C. Guyton</i>	1164	Transmembrane resistance of smooth muscle cells. <i>Barr, L.</i>	1251
Relationship of pyruvate and lactate during anaerobic metabolism. V: Coronary adequacy. <i>Huckabee, W. E.</i>	1169	Active transport of calcium by intestine: effects of dietary calcium. <i>Kimberg, D. V., D. Schachter, and H. Schenker</i>	1256
Vasoactive agents in portal blood during hemorrhagic shock. <i>Rothe, C. F. and E. E. Selkurt</i>	1177	Active transport of calcium by intestine: action and bio-assay of vitamin D. <i>Schachter, D., D. V. Kimberg, and H. Schenker</i>	1263
Cardiac output and peripheral blood flow during occlusion of carotid arteries. <i>Polosa, C. and G. Rossi</i>	1185	Effect of removal of lymphatic tissue on immune response in mice. <i>Swartzendruber, D. C., R. R. Bigelow, C. C. Congdon, and T. Makinodan</i>	1272
Size of microspheres passing through pulmonary circuit in the dog. <i>Ring, G. C., A. S. Blum, T. Kurbatov, W. G. Moss, and W. Smith</i>	1191	Effects of hormones and hypoglycemic agents on testicular fat in the rat. <i>Smith, T. C., L. Will, J. Oleson, K.-F. Benitz, J. Perrine, and I. Ringler</i>	1277
Species differences in effect of Gram-negative endotoxin on circulation. <i>Kuida, H., R. P. Gilbert, L. B. Hinshaw, J. G. Brunson, and M. B. Visscher</i>	1197	Physical and metabolic factors in diffusion of solutes into tissue slices. <i>Cascarano, J., and B. W. Zweifach</i>	1285
Electrical and mechanical activity of myocardium in mice with muscular dystrophy. <i>Kleinfeld, M., J. Magin, B. Murphy, and E. Stein</i>	1203	Failure of adrenergic and cholinergic blocking agents to block ovulation in the rat. <i>Moore, W. W.</i>	1293
Bone marrow cellularity and Na and K levels in fasting and inanition after bile duct ligation. <i>Archdeacon, J. W., W. R. Markesbery, and B. R. Binford</i>	1207	Mechanisms of calcification: role of collagen, polyphosphates, and phosphatase. <i>Fleish, H. and W. F. Neuman</i>	1296
Spreading depression using chronically implanted electrodes. <i>Ochs, S., K. Hunt, and H. Booker</i>	1211	Sites of plasma albumin catabolism in the rat. <i>Katz, J., S. Rosenfeld, and A. L. Sellers</i>	1301
Changes of visual pattern discrimination in adult cats after removal of an aspecific area of cerebral cortex. <i>Gualtierotti, T.</i>	1215	Lipid transport and lipoprotein interconversions. <i>Grundy, S. M., H. L. Dobson, G. E. Kitzmiller, and A. C. Griffin</i>	1307
Potentials evoked by sound in the auditory cortex of the cat. <i>Gummit, R. J. and R. G. Grossman</i>	1219	Enhancement by hypophysectomy of insulin effect on extrahepatic galactose transfer. <i>Kokka, N. and L. L. Bennett</i>	1311
Neuromyal blocking action of mescaline. <i>Schopp, R. T., W. F. Kreutter, and S. V. Guzak</i>	1226	Effect of insulin on potassium transfer in isolated rat liver. <i>Mortimore, G. E.</i>	1315
Paraventricular nuclei, neurohypophysis, and parturition. <i>Nibbelink, D. W.</i>	1229	Separation of insulin effects on K content and O ₂ consumption of frog muscle with cardiac glycosides. <i>Gourley, D. R. H.</i>	1320
Electrical potentials across isolated small intestine of the rat. <i>Clarkson, T. W., A. C. Cross, and S. R. Toole</i>	1233	Quantitative importance of plasma glucose for synthesis of milk fat glycerol. <i>Luick, J. R. and M. Kleiber</i>	1327
Effect of stimulation on phosphorylase levels of excised anterior tibial muscles of the mouse. <i>Rulon, R. R., D. D. Schottelius, and B. A. Schottelius</i>	1236	Collagen metabolism of rats in various hormonal and dietary conditions. <i>Smith, Q. T. and W. D. Armstrong</i>	1330
Intestinal ischemia shock in normal and Dibenzylinprotected dogs. <i>Hershey, S. G., S. Baez, and E. A. Rovenstine</i>	1239	Thyroid function and peripheral thyroxine metabolism after hemorrhage in the rat. <i>Lang, S.</i>	1335
		Effect of podophyllin lignans of mast cell morphology in rat peritoneal fluid. <i>Padawer, J.</i>	1340
		Metabolism of zinc-65. <i>Rubini, M. E., G. Montalvo, C. P. Lockhart and C. R. Johnson</i>	1345

CORRIGENDA

Volume 199, December 1960

Page 1232: WILLIAM A. BRODSKY AND GASPAR CARRASQUER, "Effect of acid and alkaline K phosphate on acid and electrolyte excretion in dogs." Page 1232, second column, first sentence should read: Theoretically, one could account for various levels of ionic excretion as follows: potassium excretion changes from low to high steady state levels as a function of exogenous load of potassium, and not as a function of metabolic acid production or excretion.

Volume 200, January 1961

Page 125: A. JUHÁSZ-NAGY AND M. SZENTIVÁNYI, "Separation of cardioaccelerator and coronary vasomotor fibers in the dog." Page 127, second column, second sentence should read: While the A-V O₂ difference and the lactate difference increased proportionately in response to pre-ganglionic stimulation, during postganglionic stimulation the A-V lactate difference increased, decreased, or was unchanged, depending on the prevalence of enhanced release, increased uptake, or a balanced uptake and output of lactate.

Volume 200, March 1961

Page 548: R. W. BRAUER, G. F. LEONG AND R. J. HOLLOWAY, "Liver injury in isolated perfused rat liver preparation exposed to chloroform." Through an unfortunate oversight, throughout the text and figures, chloroform concentrations are referred to in terms of milligrams per liter instead of the correct unit of grams per liter. Thus, the chloroform levels employed and illustrated, for instance, in figure 2 should read 0.016 g/liter, etc.
