CONTENTS OF VOLUME 226

SECTION

5 Thyroid hormone control of glutathione reductase activity in rat erythrocytes and liver.
   C. E. Menendez, P. Hacker, M. Sonnenfeld, R. McConnell, and R. S. Rivlin 1490

1, 11 Left ventricular distensibility in newborn piglets, adult swine, young kittens, and adult cats.
   J. C. Lee and S. E. Downing 1484

3, 5 Renal action of vitamin D in D-deficient rats.
   L. S. Costanzo, P. R. Sleeth, and I. M. Weiner 1490

4, 8, 11 Correlations between ionic contents in different regions and layers of intestinal muscle.
   D. D. Job and W. Bloomquist 1496

4, 8, 11 Correlations between electrolyte content and spontaneous electrical activity in intestinal muscle.
   D. D. Job, W. E. Bloomquist, and J. Bridgeforth 1502

4, 8, 11 A possible origin of intestinal gradients and their relation to motility.
   D. D. Job, W. J. Griffing, and B. E. Rodda 1510

4 Mechanism and site of vitamin K-3 small intestinal transport.
   D. Hollander and T. C. Truscott 1516
